CATALOGUES, PRICE 6d.

ALTHOUGH the entire collection of books and manuscripts formed during the past forty years by Mr. Moseley was purchased from his executors by me, it is only the choicest of his books that are noted in this catalogue; the remainder will appear in my ordinary catalogues of miscellaneous books.

I have endeavoured to make the present catalogue representative of the best occult books, and to that end have rigorously excluded what is common and valueless.

The prices may seem in some instances rather high, but I believe that when regard is had to the number of volumes in each lot, to the special interest of a book annotated by its late owner, or to the binding or state in which it is offered, it will appear that my prices are as reasonable as ever; and this is no slight thing to say since it is now recognised as a fact patent to all who are interested in books that year by year the choicer examples of occult literature are becoming more and more rare. The well-informed author of *The Library Manual*, writing in *The Athenæum* a few months ago, stated that "books on witchcraft, magic, and kindred subjects realise high prices, and a few years hence will be difficult to procure at all, unless, indeed, Mr. Redway, or some other astute purchaser cares to duplicate his stock while there is time, and keep it under lock and key, for the benefit of the next generation."

Moseley, Signature of "F. Barrett" on fly-leaf. £2 2s

Curious notes and recipes in contemporary handwriting. The Arbatal of Magick might have been penned by the most orthodox divine so far as sentiment is concerned. For example: "In all things call upon the name of the Lord; and without prayer unto God, through his only begotten Son, do not thou undertake to do or think anything." "The true and only way to all secrets is to have recourse unto God the author of all good," &c. "Unprofitable and damnable magick ariseth from this, where we lose the fear of God out of our hearts," &c. Why did the Church anathematise such books?

- Agrippa, in his letter to Abbot Tritemius, observes that the "sacred title of Magick" had fallen into disrepute, especially with the clergy. He attributes this to the publication of "wicked and unlawfull books," to which was prefixed "the most honest name and title of Magick." He therefore chooses for his work the title of Occult Philosophy, with the remark that "the supercilious censors will object against the sybils, holy magicians, and the gospel itself sooner than receive the name of Magick into favour."
- 28 AGRIPPA. The Vanity of Arts and Sciences, by Henry Cornelius Agrippa, *portrait and title mounted*, calf, 1684 £1
- Agrippa's satirical invective against everything, from Architecture to Whoring. He is most severe on the Occult Sciences and their professors; indeed, when he comes to deal with Geomancy, he confesses: "I myself have written on *Geomancy*, far different from those before-mentioned, though not less superstitious and salacious; or, if you will, I may say, *not less crowded with lyes!*"

- Note by W. M. at end, giving a recipe from "Miss Radcliffe, an unknown adept." W. M. was a practical student of Alchemy. "Golden Age" has useful MS. notes by Mich. Arne; it was dedicated to the Royal Society. R. G. published it, being next of kin to the author.
- 30 Alchemy. Hydropyrographum Hermeticum; or, a choice and most excellent treatise concerning the Fiery Water of the Philosophers. From the German, by F. Houpreght, AND MANY OTHER ALCHEMICAL TRACTS, 1 vol. 32mo. £1 7s 6d

- 237 Vaughan (Thomas). Euphrates; or, the Waters of the East; being a short Discourse of that Secret Fountain, whose Water flows from Fire; and carries in it the Beams of the Sun and Moon, by EUGENIUS PHILALETES, 1655, 16mo, calf, *fine large uncut copy*, VERY RARE £2 2s  
In the author's address "To the Reader," he says, "Alchymie in the common acception, and as it is a torture of Metalls, I did never believe;" he further takes occasion to disclaim "Alchimie in its vulgar sense," and again declares that "common gold" is by no means the matter or subject of the Philosophers, "as some Ignorants would have it." It is needless to point out the importance of these passages to those who are seeking, in the wonderful allegories of the Alchemists for something more marvellous and mystical than the "torture of metalls."

- 238 [VAUGHAN Thomas] ANTHROPOSOPHIA THEOMAGICA; or, a discourse of the nature of man and his state after death; grounded on his Creator's Proto-Chimistry, and verified by a practical examination of principles in the great world, by EUGENIUS PHILALETHES. . . . His writings show him to be a supreme adept of spiritual alchemy, and he despised the gold which he claimed to be able to manufacture. The history of this man, who roamed from place to place, performing the most lavish transmutations, but always anonymous, always obliterating his personality, often disguised to conceal his identity, by his own representation in continual dangers and difficulties through the possession of his terrific secret, and gaining nothing by his labours, is a curious study of the perversity of human character for those who disbelieve in alchemy, and some ground for the faith of those who believe in it. The essential elements of fraud are wanting, and the intellectual nobility of the man, illuminated, moreover, by lofty religious aspirations, is conspicuous in all his works. *A. E. Waite on Thomas Vaughan.*

Lucilius, or, as he preferred to style himself, Julius Caesar Vanini, was born at Naples in 1586, and attached himself to the philosophical school of Petrus Pomponatius. This celebrated Peripatetic differed from his master Aristotle, chiefly in denying the immortality of the soul. Vanini seems to have surpassed Pomponatius, and taught, in a paradoxical and semi-mystical way, rank atheism, for which he was burnt at Toulouse four years after the appearance of this volume.

"The study of occultism is not without its charms; and . . . . . the student turns joyously to the folios of the olden groopers after the Philosopher's Stone. There he finds a treasure of delightful literature, in which amusement is artfully blended with instruction, and where moral maxims are scattered about the pages which teach you how to subject your enemies to a horrible death. The old magicians in their books are equal to any emergency. They will tell you how to raise the devil, and compel him to enrich you with hidden treasures; how to bring the reluctant fair to your arms; how to cast your own nativity; or, if you trouble about none of these things, and incline to lighter sports, they will give you a recipe for charming fish out of the water, or enable you to dream that you are in whatever you may deem to be the right paradise. With speculations about the why and the wherefore of things they will not trouble you. They prefer to dilate upon the wonders of black magic, and to gloat over the one hundred thousand pounds' weight of fine gold which a friend of Raymond Lully's made by alchemical means. These musty tomes, full of significant circles and magic triangles, of red dragons and black hens, embellished with portraits of the hominical hierarchy and drawings of the essential implements for evoking spirits, have a pleasant flavour of romance. The quaint Latinity and the odd jumble of tongues in which the conjurations are written are as fine in their way as anything that ever was printed in a folio."—*Saturday Review*, April 23, 1887.

"It is certain that one branch at least of historical enquiry—that which deals with the origin and development of religious belief throughout the world—is attracting to itself an increasing degree of attention and interest."—*Quarterly Review*, July, 1886.

"Books on witchcraft, magic, and kindred subjects realise high prices, and a few years hence will be difficult to procure at all, unless, indeed, Mr. Redway, or some other astute purchaser cares to duplicate his stock while there is time, and keep it under lock and key, for the benefit of the next generation."—*The Athenæum*, Feb. 2, 1889.

"Books on Magic, Witchcraft, and kindred Occult Sciences are getting scarcer every day, and the catalogues contain hardly any references to those subjects. Paracelsus, Flood, the English Rosicrucian, and Van Helmont are unrepresented; even Delrio is absent, leaving the field to be disputed between Agrippa, who recanted, and Barrett, who had nothing to repent of. This class of work is said to be bought largely for the American market, and there are probably more specimens to be found in New York than in London."—J. H. SLATER, author of *The Library Manual* (1888).
